[rohanjoshi](#)  
Pronouns: He/Him

### Summary

AI & ML Engineer focused on predictive analytics with extensive experience in deep learning models and MERN stack development. Passionate about building scalable web applications and integrating intelligent systems to solve complex problems.

### Skills

Frontend React, HTML5, CSS3, JavaScript

Backend NodeJS, Express

Data Science Python, Deep Learning, Predictive Analytics

### Projects

Stock Prediction AI Developed a predictive model using Python to forecast market trends.

Chatbot Assistant Designed and implemented an intelligent conversational interface.

Fraud Detection System Engineered a high-security system to identify anomalous financial transactions.

### Case Studies

Predictive Analytics Comprehensive analysis on utilizing deep learning for future outcome forecasting.

NLP Sentiment Engine In-depth study on processing natural language to extract user sentiment accurately.

Computer Vision AI Research and implementation of visual data processing for automated recognition.

### Experience

2021–Present **Senior Developer, Megamind Tech, Remote**

- Developed full-stack applications using React, Node.js, and Express.
- Integrated AI models into production environments to enhance user experience.
- Optimized database queries and frontend performance for high-traffic sites.
